

Harmony® Equipment Management Systems (EMS)

Introduction

This on-site training for Equipment Technicians will provide you with the knowledge to operate and perform basic maintenance on the Harmony EMS.

Course Goal

This course provides the student with an in depth understanding of how to operate the Harmony EMS and perform basic troubleshooting and adjustments. The student will learn the theory of operation and functional descriptions for major components and how to access the STERIS® website for technical information, technical assistance or place a service request.

Please note when STERIS conducts training at your site, in order to maintain the operational readiness of your equipment during the training, this training does not rebuild or replace any components that make the equipment non-operational.

Course Outcomes

At the end of this course, the student will be able to:

- verify all utilities are available to operate the Harmony EMS.
- operate the Harmony EMS using the applicable arm accessory handles (single or double).
- locate the preventive maintenance guide and learn how to use it to perform basic preventive maintenance on the Harmony EMS.
- perform basic troubleshooting and adjustments.
- put the Harmony EMS into a safe state.
- clean the Harmony EMS.
- access the STERIS service websites for assistance.

Duration

Eight Hours

Training Location

Customer Facility

Why train at this location

Training can be tailored to fit your specific needs and scheduled to fit your timeframe, at a time and location that are most convenient to your staff. Without ever leaving your facility, your staff can gain new skills, boost their confidence, and improve their productivity.
