

PATHOGON™ UV Disinfection System

Introduction	This online training, for equipment technicians, will provide you with the knowledge to operate, maintain, and service the PATHOGON™ UV Disinfection System.
Course Goal	This course provides an overview of how to operate the PATHOGON™ UV Disinfection System and perform cleaning and inspection. The student will learn the theory of operation, decontamination cycles, and functional descriptions of the major components and schematics of the unit.
Course Outcomes	<p>At the end of this course, the student will be able to:</p> <ul style="list-style-type: none">• Describe how to operate the PATHOGON and the wireless control tablet• Describe the components and cycles of the PATHOGON• Describe the location and purpose of the PLC and control devices• Describe the function of the PATHOGON via the electrical schematic• Describe how to clean the PATHOGON• Describe procedures for five preventative maintenance tasks• Describe best practices for servicing the PATHOGON
Why train online	<p>You can decide the schedule and let your staff learn at their own pace. The training can be stopped as needed and picked up from where it is left off. Without ever leaving your facility, your staff can gain new skills, boost their confidence, and improve their productivity. An added benefit is that there are no travel costs.</p>
Equipment Needed	<p>Computer with internet access, access.</p> <p>This online training is a self-contained course and does not include a maintenance manual as part of the cost of the course. If you would like to purchase a maintenance manual for this product, please contact STERIS Customer Support to place your order.</p>
Target Audience	Biomedical Equipment Technicians and/or Hospital Maintenance Technicians
Duration	1 - 3 Hours
Evaluations	End of course evaluation
